

Smart Tensioner Package

The ultimate tool system for accurate and efficient tensioning

The benefits of the Smart Tensioner Package are numerous.

The Smart Tensioner Package - the ultimate tool system for accurate and efficient tensioning. The tool system determines when the job is done correctly, ensuring accuracy and quick positioning of the tensioner which saves time and increases productivity.

The fail-safe features prevent incorrect pump pressure settings for safe and reliable operation. The indicator shows whether the job has been correctly performed or not, providing quality control. The bolt count feature enables easy tracking of the number of bolts tightened, allowing for accurate record keeping. Adjustable parameters allow for customization to meet specific customer requirements. The system is Cloud-based and provides data logging and storage for analysis, troubleshooting, and future reference.

Our package includes:

- **Smart Tensioner:** a tool that automatically determines the correct tension level and provides an indicator for quality control.
- **Hydraulic Pump:** a powerful pump for fast and efficient tensioning
- **Hose:** a durable and flexible hose for easy connection to the tensioner and pump
- **Pelicans:** a rugged and waterproof case for safe transport and storage of the Smart Tensioner Package

Invest in the Smart Tensioner Package and experience the benefits of increased productivity, accuracy, and safety in your tensioning operations.
